Overview & Objective

A final-year Computer Science student at Helwan University with a solid foundation in data analysis, machine learning, AI, and database . skilled in Python, SQL, and data visualization, with practical experience in developing machine learning models and deriving meaningful insights from data

I seek an opportunity in Data Science and Machine Learning to leverage my analytical and technical skills in solving complex problems and deriving valuable insights from data.

Education

Helwan University – Faculty of Computer & AI (Computer Science department) 2021 – 2025 | GPA: 3

Training

AI Internship – Information Technology Institute (ITI)

Courses

- Machinfy AI & Data Science Diploma
- DataCamp Certifications:
  - Supervised Learning with Scikit-Learn
  - Preprocessing for Machine Learning
  - Machine Learning with Tree-Based Models
  - Dimensionality Reduction & Cluster Analysis
  - Feature Engineering & Model Validation

Skills & Tools

- Programming: Python (OOP, NumPy, Pandas, Matplotlib, Scikit-learn), C/C++, Java
- Data Science & ML: Machine Learning (Supervised, Unsupervised, Tree-Based Models), Deep Learning (TensorFlow, Keras, PyTorch), Pretrained Models & Fine-Tuning (Hugging Face, Transfer Learning, Model Fine- Tuning)
- Data Handling: MySQL, Data Visualization (Power BI, Matplotlib, Seaborn, Plotly)
- Web Technologies: HTML, CSS, Web Scraping
- Tools & Platforms: Jupyter Notebook, VS Code, Google Colab, Git & GitHub, CodeBlocks, NetBeans, MS SQL Server

Projects

Assurify Quality Control System on Online Educational Sessions (Graduation Project - in progress)

- Developed a quality control system for online educational sessions to verify instructor content coverage using the Whisper pretrained model, fine-tuned for Egyptian Arabic and English.
- Implemented instructor behavior analysis, detecting inappropriate words and aggressive tone using XGBoost, LSTM, OpenSmile, and pretrained models.
- Monitored instructor silence duration and ensured sound quality using Wav2Vec 2.0, detecting background noise and ensuring clear audio.

Loan Approval Classification

- Built a classification model to predict loan approval decisions based on customer data.
- Applied multiple machine learning algorithms, including KNN, SVC, Logistic Regression, Decision Trees, and Random Forest.
- Conducted data analysis and feature engineering to extract insights and improve model accuracy.

Machine Learning Projects on GitHub

- Developed multiple machine learning projects, applying classification, regression, and clustering techniques.
- Worked with various datasets to extract insights and improve model performance.
- Implemented and optimized models such as KNN, SVC, Logistic Regression, Decision Trees, and Random Forest.
- All projects are available on GitHub.

Language

- Arabic: Native
- English: Very good
